Profile

I'm a programmer that enjoys working on tough problems and learning new technologies. My primary goal is to be working on projects that are both challenging and interesting.

Skills

Learning

Very skilled and astute learner that is never afraid to dive in and learn a new technology.

Solving

Always up to solve difficult problems and enjoys embracing the unknown.

Executing

Can quickly prototype and execute on a solution while rapidly iterating as more details are learned.

Optimizing

Experienced with and enjoys finding an optimal solution to a problem, especially when it is in the critical path.

Technical

java	*sql	.net	zsh
scala	mongodb	node.js	agile
akka	couchdb	grails	html
concurrency	hadoop	clojurescript	css
clojure	javascript	haskell	jvm
play framework	spring	amazon web services	linux
groovy	c#	bash	kafka

Experience

SPARC LLC
Senior Software Developer

2011-Present

Worked on various products and services including backend service apis, distributed architectures, and a time based event datasource. Used technologies such as Java, Scala, Clojure, Node.js, Spring, Play 2, Spray, Ring, Compojure.

Benefitfocus
Software Developer

2007-2011

Worked on flagship application eEnrollment primarily in Java for 2 years. Later worked on Communications Platform, a dynamic system written in C# on the .net platform. Also worked on a couple of projects written in Groovy and Grails.

Education

College of Charleston / The Citadel
Master of Science, Computer Science — 2011

The Citadel
Bachelor of Science, Computer Science — 2008
